## SEOLINKPRO Overview

Firstly I would like to congratulate you on your purchase and welcome you to the exclusive Black Hat SEOLINKPRO user base. If you have not done so already, you should register an account at the exclusive Syndk8 tool owner's forum where members share ideas, tips and usage principals of SEOLINKPRO as well as other Syndk8 Tools & hidden Black Hat underground techniques. The Exclusive forum is located at: <http://x.neek.org> and is for Syndk8 tool owners only.

SEOLINKPRO
 Auto Mail Confirmer
 Independent Projects
 Auto Link Building
 Framework Based

**SEOLIKPRO is a Back Link Framework;** it has an expandable modular based link building design. This means that there will be continuous development of plug-ins that allow for expandability and diversity of link building sources. No other Black Hat link building tool has ever had this form of architecture or technological structure.

### Included Plug-ins and expandability of Plug-ins

SEOLINKPRO Plug-ins is broken up into 3 sections: BH plug-ins, Social Bookmark Plug-ins and RSS Submission Plug-ins.

SEOLINKPRO ships standard with the following BH plug-ins:

Blurtit Answers	plugin_blurtit.dll
Oggix Shouter	plugin_oggix.dll
Custom WordPress	plugin_wordpress_custom.dll
Events Calendar	plugin_calendar_pl.dll
Scuttle Submission	plugin_scuttle.dll
Syndk8 Awstats	plugin_awstats.dll
Syndk8 Joyful	joyful.dll

## SEOLINKPRO

Syndk8 Nucleus CMS v3.40 Comments	plugin_nucleus.dll
Syndk8 PHP Guestbook Plugin	CustomPlugin.dll
Syndk8 PostNUKE English	plugin_postnuke_en.dll
Syndk8 Webalizer	plugin_webalizer.dll
Syndk8 Wikka Plugin	plugin_wikka.dll
Syndk8 Wikka2	plugin_wikka_nonrw.dll
Syndk8 Wordpress Comments Plugin	WordPressPlugin.dll
Syndk8 e-Classifieds Plugin	plugin_eclassified.dll
Syndk8 minibbs	plugin_minibbs.dll
Syndk8 php dug	plugin_php dug.dll
Syndk8 phpnuke English	plugin_phpnuke_en.dll
Syndk8 phpnuke Polish	plugin_phpnuke_polish.dll
Syndk8 yybbs	plugin_yybbs.dll
apeboard	plugin_apeboard_plus.dll
jawanote bbs	plugin_jawanote.dll
kawaii bbs	plugin_kawaii.dll
yoyuuha bbs	plugin_yoyuuha.dll

BH Plug-in packs will be available for purchase as they are developed, SEOLINKPRO forum members will be notified of newly developed and available plug-ins via the exclusive SEOLINKPRO forum.

### The "BH Plug-in" Packs

Each one of the above depicted plug-ins can be enabled or disabled at your discretion. This means that if you elect not to generate links to your website via Wikka2 sites for an example or any other plug-in related site for that matter, you can simply disable it by un-ticking the relevant check box in the settings option. By default all the plug-ins are enabled.

SEOLINKPRO ships standard with the following Social Bookmark Plug-ins:

www.mister-wong.de  
www.fark.com

misterwong.dll  
fark.dll

Social Bookmark Plug-in packs will be available for purchase as they are developed, SEOLINKPRO forum members will be notified of newly developed and available plug-ins via the exclusive SEOLINKPRO forum.

**The “Social Bookmark Plug-in” Packs**

Each one of the above depicted plug-ins can be enabled or disabled at your discretion. This means that if you elect not to generate links to your website via Reddit sites for an example or any other plug-in related site for that matter, you can simply disable it by un-ticking the relevant check box in the settings option. By default all the plug-ins are enabled. Note: The Social Bookmark Plug-ins take a White Hat bookmarking approach and are included in SEOLINKPRO to make your SEO practice easier.

SEOLINKPRO ships standard with the following RSS Submission Plug-ins:

BlogDigger.com RSS	blogdigger.dll
Feedest.com RSS	lugin_rss_feedest.dll
sourceforge rss	sf_rss.dll
www.2rss.com	2rss.dll
www.feedgy.com	feedgy.sc.dll
www.feedplex.com	feedplex.dll
www.goldenfeed.com	plugin_goldenfeed.dll
www.readablog.com	readablog.dll
www.rssmad.com	plugin_rssmad.cs.dll
www.feedboy.com	plugin_rss_feedboy.dll
www.feedsfarm.com	plugin_rss_feedsfarm.dll
www.icerocket.com	plugin_rss_icerocket.dll
www.leighrss.com	plugin_rss_leighrss.dll
www.plazoo.com	plugin_rss_plazoo.dll
www.readablog.com	readablog.dll
www.rssmad.com	plugin_rssmad.cs.dll
www.rssmotron.com	plugin_rss_rssmotron.dll

## SEOLINKPRO

RSS Submission Plug-in packs will be available for purchase as they are developed, SEOLINKPRO forum members will be notified of newly developed and available plug-ins via the exclusive SEOLINKPRO forum.

### The “RSS Submission Plug-in” Packs

Each one of the above depicted plug-ins can be enabled or disabled at your discretion. This means that if you elect not to generate links to your website via a certain RSS Aggregator such as 2rss for an example or any other plug-in related aggregator, you can simply disable it by un-ticking the relevant check box in the settings option. By default all the plug-ins are enabled. Note: In order to benefit from the RSS Submission you need to be able to facilitate at least 1 RSS feed from your website.

Ok, now that we have covered the core construct of SEOLINKPRO and you understand how the plug-ins work let's move on.

## Menu Overview and functions explained

### The HOME Menu

The first button on the menu system is the HOME button and by default will be the selected button when you start SEOLINKPRO. The HOME Button will display information in 2 panels, the left panel will display a quick overview of the number of Projects you have, the number of pages, the total number of installed plug-ins and the total number of targets. The right hand side panel contains an expandable tree view of your projects and their respective elements consisting of the number of Pages for that project, the number of links created for the expanded project and the date / time the project was created.

Project Name	Pages	Links	Added
BigPhatShop	47	44	2009-07-09 03:27:04
SeoLinkPro.net	52	0	2009-07-09 04:19:49

\*Note: In order to open a previously expanded project you must collapse the tree at the project level and then expand it again.

## SEOLINKPRO

By expanding a specific project, the details for that project are expanded on the bottom panel. This panel contains editable details such as the Name of the Project, and the number of links SEOLINKPRO must create per day for this specific project.

The screenshot shows the 'Project Settings' window. On the left, there are input fields: 'Project Name' with the value 'SLP', 'Match Topic' with a slider set to 'Mix Everything' and '300' in a box next to 'Daily Links', and 'Base Keywords' with the text 'seolinkpro, blackhat, black hat tool, link building, black hat link building, bl'. Below these is a 'Content Source' dropdown menu showing 'content\example\_content.txt'. On the right, there is a table with a 'Use' column and a 'Plugin' column. The plugins listed are 'Blurit Answers', 'Custom WordPress', 'Events Calendar', 'Oggix Shouter', and 'Scuttle Submission', all with checked boxes in the 'Use' column. An 'Update' button is at the bottom right.

The Match Topic slider allows you set how close the match must be for your Base Keywords, The closer the slider to the left the more exact the match will be according to your Base Keywords. The trade off for more exact matches is slower link building. The column on the right “Use Plugin” allows you to enable or disable specific plug-ins per Project. The Update button will update your settings. The Content Source allows you to elect weather you prefer to use AutoContent (automatically generated content by SEOLinkPRO) or your own content which is used for posting.

The Structure of the Content will be as follows:

Text {word or phrase 1| word or phrase 2| word or phrase 3} text {word or phrase 4| word or phrase 5| word or phrase 6} Text. You can also include a link in the comment by using #link#

The #link# needs to be replaced with your actual link. i.e #http://www.seolinkpro.net#

To add more custom articles for your various project’s place the content files in the SEOLINKPRO/Content folder. \*Note you might have to restart SEOLINKPRO in order to have the content available in the dropdown.

## SEOLINKPRO

### The NEW PROJECT Menu

The NEW PROJECT button is where you will create and architect your Automatic link building campaign. The NEW PROJECT will display information in 2 panels as depicted by the image below, the left panel will display an editable field where you can specify the Project Name, define the Base URL for the site you want to build links to. The Match Topic slider allows you set how close the match must be for your Base Keywords, The closer the slider to the left the more exact the match will be according to your Base Keywords. The trade off for more exact matches is slower link building.

Daily Links defines the number of links you want SEOLINKPRO to build you per day this number can be set to anything you want. Be cautious of not building too many links per day on new domains as you could get yourself sandboxed. A good number per day for new domains is around 100 links.

Base keywords are where you define the keywords for the site you want to build links too. Ensure that the keywords are relative to the site.

Below that you will see this:  do nothing  Crawl  RSS  Sitemap.xml  File (CSV)

The “do nothing” option will ignore this option, “Crawl” will crawl your site and discover all the URL’s and tags,” RSS” will allow you to specify a RSS feed,” Sitemap.xml” will allow you to specify your Sitemap and CSV will allow you to select a CSV file and load your target sites URL’s into the index. This in turn gives you the options of building deep links to your site.

A screenshot of the 'New Project' form. The form has a title 'New Project' at the top left. It contains several input fields: 'Project Name' (empty), 'Base Url' (http://), 'Match Topic' (a slider set to 'Mix Everything' with a value of '10' and 'Daily Links' text), 'Base Keywords' (Keyword1, Keyword2, Keyword3), and 'Content Source' (a dropdown menu showing 'AutoContent' and 'content\example\_content.txt'). Below the 'Base Keywords' field are radio buttons for 'do nothing' (selected), 'Crawl', 'RSS', 'Sitemap.xml', and 'File (CSV)'. On the right side, there is a table with columns 'Use' and 'Plugin'. The 'Use' column has checkboxes for 'Blurit Answers', 'Custom WordPress', 'Events Calendar', 'Oggix Shouter', 'Scuttle Submission', and 'Syndk8 Awstats', all of which are checked. At the bottom right, there is a 'Next' button with a green arrow.

The column on the right “Use Plugin” allows you to enable or disable specific plug-ins per Project. The Update button will update your settings.

The Content Source will either generate content from your specified articles or SEOLINKPRO will automatically generate content for you.

Once completed click the Next Button and all the information will be stored in the Project Library.

## SEOLINKPRO

### The PROJECT LIBRARY Menu

The PROJECT LIBRARY button is where you will be able to access your list of created projects and start or stop the link building process for a specific project as depicted by the image below. You can also delete old projects. Caution: If you accept the delete Project message box there is no way of retrieving the project information and all associated details of that project will be deleted permanently.

A project that has started running such as the SeoLinkPro.net project depicted above will display posted link results in the bottom panel as depicted in the image below:

## SEOLINKPRO

### The SOCIAL LINKS Menu

The SOCIAL LINKS button is where you will be able to architect your Social bookmarks; this allows you to define your URL, Title, Description as well as association to TAGS and Categories for easy fast submission to social bookmarking sites. The Pick sites list are displayed and defined as Plug-ins. You can enable or disable specific Social plug-ins by enabling or disabling the relevant check boxes.

### Social Bookmarks

Pick Sites

Use	Website
<input checked="" type="checkbox"/>	<a href="http://www.fark.com">www.fark.com</a>
<input checked="" type="checkbox"/>	<a href="http://www.mister-wong.de">www.mister-wong.de</a>

\*Note: In order to use Social Links you need to specify your Social Bookmarking account details for each of the Sites defined in the list in the settings menu as depicted below:

### Social Bookmarking Plugins

Website	dll	Username	Password
<a href="#">Reddit Bookmarking Plugin</a>	plugin_reddit.dll	SIRRU5	*****
<a href="http://www.fark.com">www.fark.com</a>	fark.dll		
<a href="http://www.mister-wong.de">www.mister-wong.de</a>	misterwong.dll		

By clicking the  button will submit the defined detail to the selected sites.

## SEOLINKPRO

### The RSS SUBMIT Menu

The RSS SUBMIT button is where you will be able to architect your RSS submission; this allows you to define your URL, Title, Description as well as association to TAGS and Categories for easy fast RSS submission to RSS aggregators. The Pick sites list are displayed and defined as Plug-ins. You can enable or disable specific RSS aggregator plug-ins by enabling or disabling the relevant check boxes.

**RSS Setup**

Url

Title

Description

Tags

Categories

Pick Sites

Website	Use
<a href="#">BlogDigger.com RSS</a>	<input checked="" type="checkbox"/>
<a href="#">Feedest.com RSS</a>	<input checked="" type="checkbox"/>
<a href="#">sourceforge.rss</a>	<input checked="" type="checkbox"/>
<a href="#">www.2rss.com</a>	<input checked="" type="checkbox"/>
<a href="#">www.feedgy.com</a>	<input checked="" type="checkbox"/>

By clicking on button you will submit your RSS feed to all selected aggregators.

By clicking on the  button you will submit your defined urls to the ping sites.

**The STATUS Menu**

The STATUS button is where you will be able to architect your RSS submission; this allows you to define your URL, Title, Description as well as association to TAGS and Categories for easy fast RSS submission to RSS aggregators. The Pick sites list are displayed and defined as Plug-ins. You can enable or disable specific RSS aggregator plug-ins by enabling or disabling the relevant check boxes.

By clicking on links quota that  button SEOLINKPRO will automatically build your daily defined for every project in SEOLINKPRO.

The Start button will then change to a  button which will allow you to stop the link building campaigns.

\*Note: SEOLINKPRO must be active for this process, you can minimize SEOLINKPRO to the windows tray and you will see this icon:  In order to bring SEOLINKPRO back to focus simply double click on the tray icon.

**The REPORTS Menu**

The REPORTS button is where you will be able to generate reports based on a specific project that you have configured. The reports will display the number of pages you have in the project, the number of total links you sent, the indexing stats consisting of Google, Bing and Yahoo status as well as the number of backlinks from Yahoo and Alltheweb.

By selecting a Project from the dropdown menu and click on the Generate Report button you will generate a report for the selected project. This can be done as often as you like per project and will keep record of your historic reports so that you can track your link building and indexing progress. By clicking on the Project name Link in the report, a new browser window will be opened detailing your results as depicted by the image below.

**Report for <http://www.seolinkpro.net> Created 9/07/2009**

**Project Overview**

Date added: 2009-07-09 04:19:49  
Pages in Project: 52  
Total links sent: 0

**Indexing Stats**

Google: 1 (0)  
Bing: 0 (0)  
Yahoo: 0 (0)

**Backlinks**

Yahoo: 1(0)  
Alltheweb: 0 (+0)

## SEOLINKPRO

### The SETTINGS Menu

The SETTINGS button is where you will be able to configure various aspects of the SEOLINKPRO framework and consists of BH Plug-in configuration, Social Bookmarking Plug-in configuration, and finally the Email setup configuration which relates directly to auto registration and confirmation of new accounts needed for specific link building plug-ins.

PluginName	dll	Active
Syndk8 e-Classifieds Plugin	plugin_eclassified.dll	<input checked="" type="checkbox"/>
Syndk8 minibbs	plugin_minibbs.dll	<input checked="" type="checkbox"/>
Syndk8 php dug	plugin_php dug.dll	<input checked="" type="checkbox"/>
Syndk8 phpnuke English	plugin_phpnuke_en.dll	<input checked="" type="checkbox"/>
Syndk8 phpnuke Polish	plugin_phpnuke_polish.dll	<input checked="" type="checkbox"/>
Syndk8 yybbs	plugin_yybbs.dll	<input checked="" type="checkbox"/>

BH Plugin settings allow you to enable or disable specific plugins based on a global setting. I.E if you elect not to use php dug link building you can simply uncheck the relevant “Active” check box which will disable the use of this plugin across all your projects immediately.

Website	dll	Username	Password
<a href="#">Reddit Bookmarking Plugin</a>	plugin_reddit.dll		
<a href="http://www.fark.com">www.fark.com</a>	fark.dll		
<a href="http://www.mister-wong.de">www.mister-wong.de</a>	misterwong.dll		

The Social Bookmarking Plug-in requires that you specify your username and password for the listed Social Bookmark plug-ins in order to submit to the various web bookmarking properties.

\*Note: You elect which bookmarking sites you want to submit to by clicking on the  button.

### RSS Submission Plugins

PluginName	dll	Active
BlogDigger.com RSS	blogdigger.dll	<input checked="" type="checkbox"/>
Feedest.com RSS	plugin_rss_feedest.dll	<input checked="" type="checkbox"/>
sourceforge rss	sf_rss.dll	<input checked="" type="checkbox"/>
www.2rss.com	2rss.dll	<input checked="" type="checkbox"/>
www.feedgy.com	feedgy.sc.dll	<input checked="" type="checkbox"/>
www.feedplex.com	feedplex.dll	<input checked="" type="checkbox"/>

RSS Submission plug-in settings allow you to enable or disable specific plug-ins based on a global setting. I.E. if you elect not to use a specific RSS agregator you can simply uncheck the relevant “Active”check box which will disable the use of that specific plugin across all your projects immediately.

### Email Setup

Email	Login	Password	Protocol	Server	Use
					<input type="checkbox"/>

Email Setup allows you to add email addresses to SEOLINKPRO, these addresses will be used during the account creation process required for certain websites. SEOLINKPRO will automatically access the email account, check the email and click on the account confirmation link.

You can add as many email accounts as you like however they must be IMAP or IMAPSSL accounts. When you start populating the first email account a second input field will be made available ad depicted below.

### Email Setup

Email	Login	Password	Protocol	Server	Use
					<input type="checkbox"/>
					<input type="checkbox"/>

All the fields must be correctly populated. If the use checkbox is checked then SEOLINKPRO will use that email account. It is suggested that you use 2 or 3 email accounts.

\*Note: Gmail is not a suitable email provider for SEOLINKPRO.

You can register free IMAP E-mail Account(s) here : <http://www.fastmail.fm>

In the Proxies panel You can specify specific a list of proxies that you would like SEOLINKPRO to use. The proxies must be in the following format: ipaddress:port i.e 10.10.10.10:2020 or http://exampleproxy.net:2020

On the left hand side below the setting you will see some information that looks like this:

This information is updated by Syndk8 to inform you of new changes or plugins that are available.

Belbow that you will see the following:

This counter will display the amount of links built in total since the application was started across all of your running projects. \*Note: If you close SEOLINKPRO and open it again this counter will be reset and will reflect 0.
